11.4_D

Model answers

	Main topic	Further details
Extract 1	ensuring your values are similar to the values of the company you want to work for	values of a company not always clear example of Google – conducting research on AI for military uses employees not happy – 1,000s wrote to management Google dropped the contract as a result
Extract 2	autonomous aerial vehicles (drones) as weapons	many companies creating autonomous aerial vehicles some used for surveillance but some used as weapons evidence from UN of use of autonomous drones to select targets and fire weapons at them need for legislation to control these developments
Extract 3	legislation on the use of AI-enhanced facial recognition systems	systems allow individuals to be tracked and monitored need for control over the technology comparison between legislation in different countries
Extract 4	civil law as a possible way to address some AI issues	civil law can be used to address some issues example – using civil law if self-driving vehicles do damage because of negligence example – civil case if governments infringe right to privacy
