7.3_C

Possible answers

Final stages SDLC $\rightarrow$ deployment
 $+$ maintenance

Depends on context:

- make new version available OR
- roll out upgrade quickly (e.g., security)
or over longer period $\uparrow$ chance
of finding bugs

SDLC $=$ linear model, old ($\therefore$ 1960s)
but useful

Software dev. process incremental
 $+$ iterative

DevOps $=$ development + operations

growing sector $\therefore$ many career opps.
